Steeplechase

START

You need ☑ a different-coloured counter for each player
☑ 4 sets of digit cards (1–9)   ☑ a classmate

0 10 20 30 40 50 60 70 80 90

Game

To play Steeplechase, each player puts their horse (a counter) on Start.
- Shuffle the cards and put them face down.
- Take turns to take the two top cards and multiply the numbers on the cards.
- Round the answer to the nearest 10. This will tell you how far to move your horse this turn. For example, if you pick up nine and two, 9 x 2 = 18. This rounds to 20, so you move two spaces.
- Put your cards back on the bottom of the pile. Shuffle the cards occasionally.

The winner is the first player to reach Finish.
