

Wooden Projects

ACTIVITY

Mr Young, the technology teacher, insists that his students must measure the wood for their projects in millimetres.

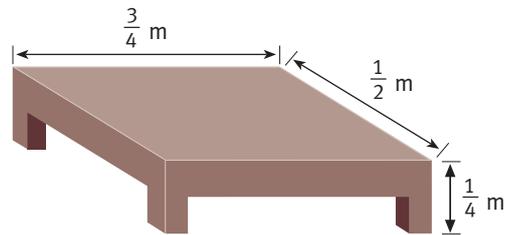

Unfortunately, some of his students have found project designs where the measurements are given as fractions of a metre.

Help these students to convert their measurements so that Mr Young will allow them to begin their projects.

i.

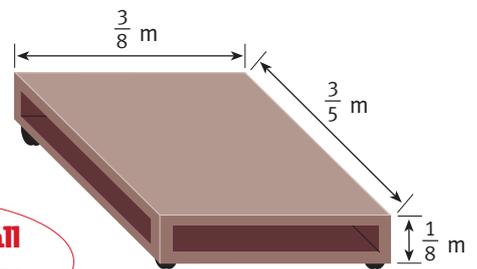

I want to make this coffee table.

ii.

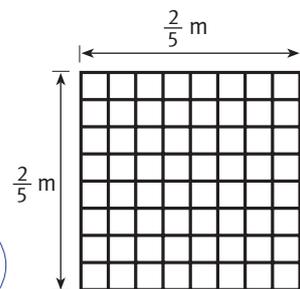

We need a small trolley for the TV.

iii.

I love to play chess, so I'm making this chessboard.

Each square has sides of $\frac{1}{20}$ m.

iv.

My mother says I have to get my books off the floor, so I'm making a bookcase.
