

Your task is to work on your own to find out how many slices of tomato will fit around the edge of a pizza.

Diameter of tomato slices: 6.5 cm

Pizza base: provided

1. Estimate how many slices of tomato will fit around the edge of the pizza. Record this estimate.
2. Plan the way you will work this out and write it down. Include a list of the tools you will use.
3. Follow your plan to come up with an answer and record this below your plan.
4. Can you think of a way to check your answer?
