

Here is a stack of 4 cubes.  
I want you to make a stack that is three times higher.  
How many cubes will you need?

I have 5 cubes and you have 20 cubes.  
Tell me about the number of cubes you have, and I have.  
Can you use addition and subtraction words like  
“more” or “less” or “difference”?  
Can you use multiplication and division words like  
“times as many” or fraction words?

Here is a stack of 15 cubes.  
I want you to make a stack that is five times less than this stack.  
How many cubes should be in the stack?  
What fraction of my stack, is your stack?

I have 21 cubes.  
You have 6 times as many cubes as me.  
How many cubes do you have?

I have 8 cubes and you have 48 cubes.  
How many times more cubes do you have than me?

You have four times as many cubes as me.  
If you have 36 cubes, how many do I have?
