

Finding a Balance

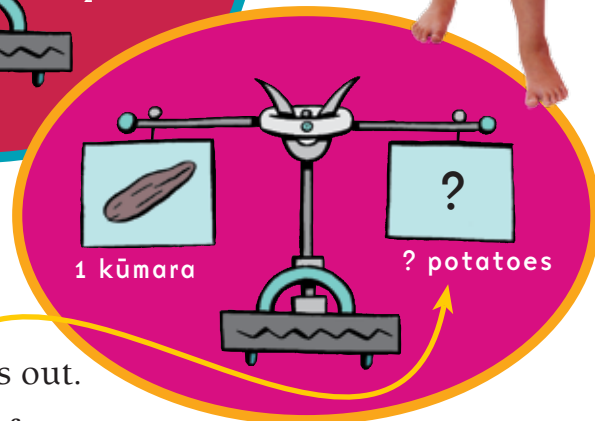

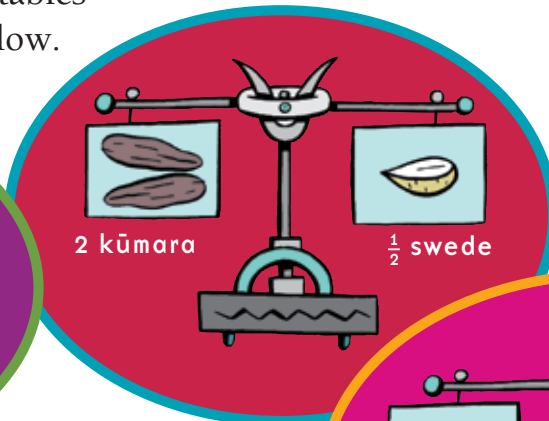

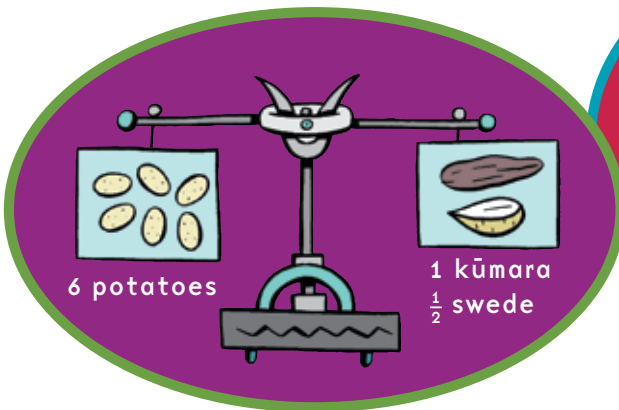

You need a classmate

Activity

1. Draw scales that show the amount on each set of scales below and insert the numbers of objects that will balance them. Write an equation for each set of scales.

2. Look carefully at the vegetables on each balanced scale below.

How many potatoes will balance 1 kūmara?
Discuss with a classmate how you worked this out.

3. Make up some balance problems of your own for your classmate to solve. Make sure you know what the correct equation is first!
