# Adventure Tokens

You need ☑ a classmate

Activity

Naraini is at Adventure Park with some of her friends. They have all bought tokens to use on rides.

Adventure Park Prices

Merry-go-round	4 tokens
Mega Swing	5 tokens
Wild River Ride	6 tokens
Bumper Boats	7 tokens
Dodgems	7 tokens
Loop-de-loop Roller Coaster	8 tokens

1. a. Naraini uses one-third of her tokens having 6 rides on the roller coaster. How many tokens does she have left?

   b. What could she ride on to use up all her remaining tokens exactly?

2. Karika wants to go on all the rides 3 times. How many tokens will he need?

3. Tessa, Karl, and Rangi use 126 tokens altogether on the dodgems. They each have the same number of rides. How many rides do they have each?

You could use multiplication or division for this one.

4. Tessa's cousin Chloe has 50 tokens, and she only wants to go on the river ride and the bumper boats. How many times could she go on each to use all her tokens?

5. Make up two problems using Adventure Park tokens for a classmate to solve.
