

# Dot to Dot

- You need  1 or 2 classmates  
 a photocopy of the game board copymaster

## Game

- Players take turns to join a pair of dots anywhere on the game board.
- When a player completes a square, they must solve the problem inside it. The answer tells them how many points they earn for getting it right.
- Players check each other's answers and make sure that points are earned only for answers that are correct.
- A player can only join one pair of dots in each turn.
- The game finishes when all the dots have been joined.
- The player with the highest number of points wins.

$\frac{1}{2}$  of 6 is the same as  $\frac{1}{2} \times 6$ .

The answer is 3, so I get 3 points.

## Activity

Create your own dot to dot fractions game using a photocopy of the empty game board copymaster. Challenge two classmates to play the game, using your board.
