Spot prizes

Simon is helping to organise the 18th birthday celebrations of the local cycling club.
They think abut 270 people will attend.
If they give a spot prize to every 18th person, how many prizes will they need?
What percentage of the people would get a prize?

On the day, 360 people attend.
How many more spot prizes are needed?
Is the percentage of people who get the prizes the same in both cases?
