

A case for a new phone

Ian made a case for his old iPhone on a 3D printer. The case has dimensions 116 mm high by 58 mm wide. Now that he has a new iPhone, he needs a case that is 139 mm by 70 mm.

He wants to print the same case, but it needs to fit his new phone.

Describe the transformation(s) to the old case that Ian will need to tell the printer to make a case that fits his new phone.
