

Dartboards

The twins each have three darts and a dartboard with three rings.

Here is Hana's board. What **possible totals** can she score if all of her darts land on the board?

Here is Henri's board. Not all of the numbers on his are the same as on Hana's.

The possible totals that Henri can make are 9, 11, 13, 15, 16, 18, 20, 23, 25, 30.

What numbers are on Henri's board?
