

Darts game

Maddie has a **dart board** on which the outer ring scores 3 points and the inner ring scores 7 points. Maddie has three darts.

What scores can Maddie get?

Maddie decides to change the rules. She can now **add and subtract** the 3s and 7s. What possible positive scores can she get?

What **whole positive numbers** can Maddie get if she uses any of the four operations of addition, subtraction, multiplication and division?
