

# Dead Calculators

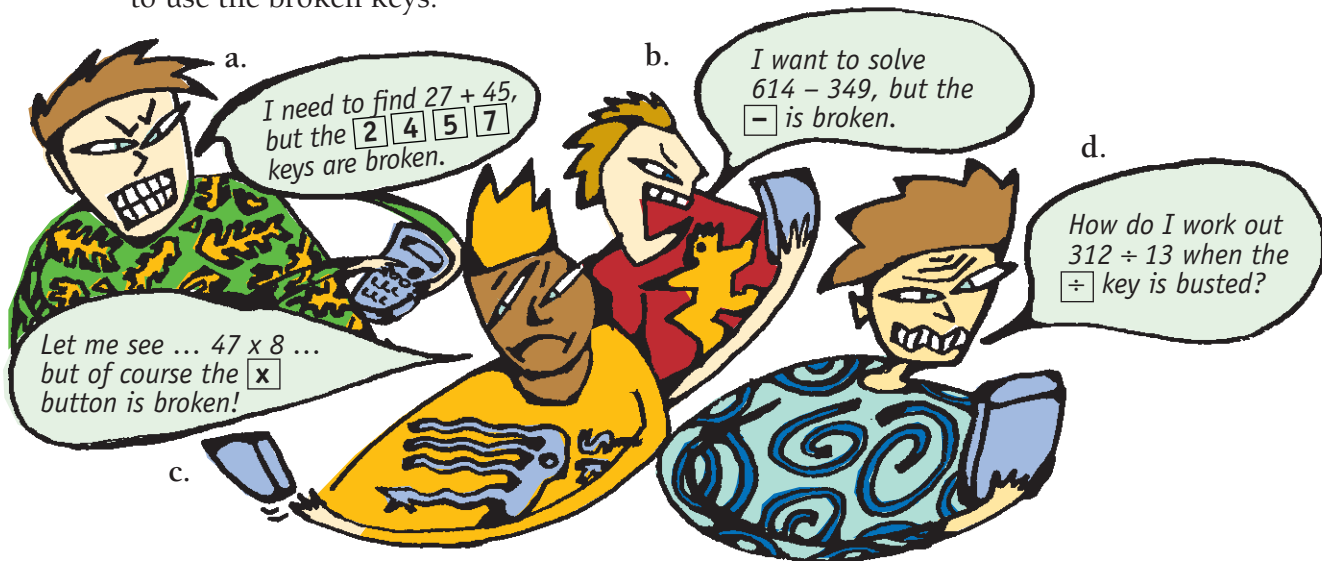

You need  a calculator

a classmate

## Activity One

Aunty Bet bought everyone in the family a calculator for Christmas. Unfortunately, some buttons did not work on each calculator.

1. Help each person work out the answer to their problem without having to use the broken keys.

2. Make up some broken calculator problems for a classmate to solve.

## Activity Two

The only buttons that work on Aunty Bet's calculator are

$5$ ,  $2$ ,  $+$ ,  $-$ ,  $=$ , and  $\text{ON}$ .

Even so, I can make all the numbers from 1 to 20 if I need them!

1. Is Aunty Bet right?
2. How do you know?
