

# Emani's Haircutting

You need  counters or cubes

a classmate

## Activity

Today is Emani's haircutting ceremony. After the ceremony, the guests will be given gifts of food.

Emani's family is going to give the guests 24 talo altogether.

1. Emani's cousins Tiva and Sale each pick up half the talo to carry in from the car.  
How many talo does each cousin pick up?

Hey, kids, that's a lot of talo to carry!  
Let's share them equally.

2. Uncle Kupa comes to help them carry the talo.  
They each carry a third of the talo.  
How many talo do they each carry now?
3. Young Ligi wants to help carry the talo, too.  
If he is allowed to help, what fraction of the talo would each person carry now?  
How many talo is that?
4. Make up your own story about a celebration.  
Ask a classmate some fraction and sharing questions about your celebration story.  
Make sure you know the answers before you ask your classmate the questions.
