

Grocery Grapplers

You need: a classmate

ACTIVITY

Nick and Ema are buying food for the school camp. They are trying to work out how much of each item they need. Solve the problems for them. Discuss with a classmate the methods you used.

1. **3 litres of cordial in each bottle.**
How many litres will be in 14 bottles?

2. **There are 6 muesli bars in each packet.**
We'll need 78 bars. How many packets is that?

3. **9 bananas weigh about 2 kilograms.**
If I get 18 kilograms, about how many bananas will that be?

4. **10 kilograms of potatoes cost \$3.50.**
We need 40 kilograms. What will that cost?

5. **It says each roll of plastic wrap is 25 metres.**
You can wrap about 4 sandwiches in 1 metre. How many sandwiches can you wrap with a whole roll?

6. **There are 12 chocolate fish in each bag.**
We need 78 chocolate fish altogether. How many bags shall we get?

You can wrap about 4 sandwiches in 1 metre. How many sandwiches can you wrap with a whole roll?

We need 78 chocolate fish altogether. How many bags shall we get?
