

Make 4.253

Gill is playing with her name and with numbers. She lets all her **consonants** equal 1.3 and all her **vowels** equal 0.5. So the value of Gill's name is $1.3 + 0.5 + 1.3 + 1.3 = 4.4$

What is the **value** of your name?

Change the rules so that the value of your name is 4.253
