Decimal Fractions – Tenths

Make One.

We are learning to add decimal fractions by first making up pairs that add to one.

Exercise 1

What to do

- 1) Use the strategy of making one. Work out the answers by first crossing out pairs of numbers that add to one.

For example: $0.6 + 0.8 + 0.4 + 0.4 + 0.2 = 2.4$

- | | |
|--|---|
| 1) $0.6 + 0.7 + 0.4 + 0.8 + 0.3$ | (2) $0.3 + 0.8 + 0.7 + 0.9 + 0.2$ |
| 3) $0.6 + 0.8 + 0.4 + 0.4 + 0.2$ | (4) $0.4 + 0.8 + 0.6 + 0.4 + 0.2$ |
| 5) $0.5 + 0.6 + 0.4 + 0.4 + 0.5$ | (6) $0.9 + 0.8 + 0.4 + 0.5 + 0.5$ |
| 7) $0.3 + 0.8 + 0.7 + 0.4 + 0.8$ | (8) $0.1 + 0.5 + 0.4 + 0.5 + 0.9 + 0.6$ |
| 9) $0.8 + 0.1 + 0.4 + 0.2 + 0.9 + 0.6$ | |

Decimal Fractions – Tenths

Make One

Answers

Exercise 1

- | | |
|--------|---------|
| 1) 2.8 | (2) 2.9 |
| 3) 2.4 | (4) 2.4 |
| 5) 2.4 | (6) 3.1 |
| 7) 3 | (8) 3 |
| 9) 3 | |
