10	11	12	13	13	14	14	15	16	17	17	16	15	14	13	12

Game

Decide which colour counter you will each play with. Place your counters in front of you.

Each person chooses one of the rows of numbers around the edge of this page to be the row they will play on.

Take turns to throw the two dice. When it is your turn, add up the numbers on the dice and cover the sum in your row of numbers with a counter.

Your classmates must check that you have added up the numbers correctly.

If you get a sum wrong, you must put your counter back and wait until your next turn to try again.

If you throw a sum that's not on the board or a sum that is already covered, you pass the dice on to another player and wait until your next turn to try again.

The winner is the first person to cover all the numbers in their row.
