

Paul's patterns

Paul is talking to Pesi on the phone. He is trying to describe a **pattern** to Pesi but he can't find the words.

If Paul's pattern is: 3, 7, 11, 15, ... how can he describe to Pesi how to get any member of the number pattern?

How can Paul tell Pesi how to get the 50th number in as simple a way as possible?
