# Putting Numbers to Work

> **You need** ☑ tens frames ☑ counters
> ☑ a 100-number line or hundreds board

Activity One

At the start of the day, Millie the Milkie had a 2 litre container in every space in these milk crates.
At the end of the day, she has these containers left:

1. **a.** How many blue containers are left?

   b. How many green containers are left?

   c. How many yellow containers are left?

2. **a.** Did Millie sell over half her milk?

   b. How do you know?

How many more steps until I reach 100?

Activity Two

Herbie is on step 47 of a staircase with 100 steps.

1. How many steps has he got left to climb?

2. How many steps would he have left to climb if:

   a. he was on step 75?

   b. he was on step 13?

   c. he was on step 29?

3. What is the best way to solve these problems?

Applying place values with two-digit whole numbers
