

# Quacky Questions

## Problem One

How many different rectangles can you find in this figure?

## Problem Two

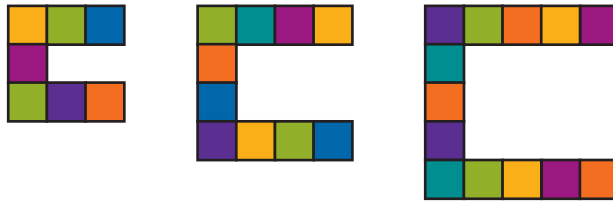

There are sheep and ducks in the farmyard. There are 24 legs and eight animals.

How many ducks are there?

## Problem Three

How many square tiles will you need to make the fifth shape in this pattern?

## Problem Four

Copy these four pizzas carefully into your book. Make three straight cuts in each pizza so that each piece has only one olive on it.
