

Sara's table

Sara has some squared paper handy. She put the numbers 3, 6, 9, 12, 15, 18, 21, 24 along the top and the numbers 5, 10, 15, 20, 25, 30, 35 down the side. She then started adding the numbers together.

As she filled in the numbers she began to see **patterns**.

+	3	6	9	12	15	18	21	24
5			14			23		
10		16						
15	18				30			
20								
25								
30								

Find some patterns for yourself. Use them to complete Sara's table.
