

Seeing Cs

Problem One

Mere's cat is three years older than her dog.
The sum of her pets' ages is 14.
How old is her dog?

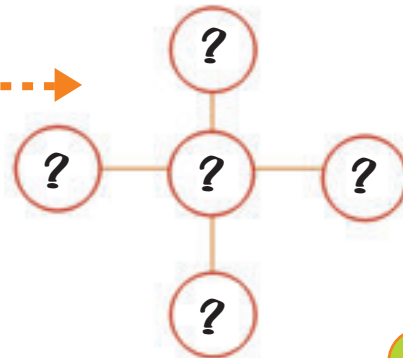

Problem Two

You have five coins in your hand, which add to 90 cents.
What might the coins be?

Problem Three

Put the numbers 1, 4, 5, 7, and 10 in different circles so that the numbers going down add to the same amount as the numbers going across.

Problem Four

How many small cubes were needed to make this building?
