

## Sharing lollies

On Monday, Sam, Sonny and Sylvia **share some lollies** they'd been given. Sonny got half as many lollies as Sam, and Sylvia got a third as many lollies as Sam got.

They got the **same number of lollies each day** up to (and including) Friday.

If Sam got 18 lollies on Wednesday, how many lollies did Sonny get on Thursday?

How many lollies did Sylvia get that week?
