

# Sneaky Snakes

**You need:** ★ a counter    ★ copymaster of the tally charts    ★ a dice

## Activity

**Start**

**How to play:** Throw the dice and move the counter. Count how many throws it takes you to reach (or pass) Finish.

1. a. Play this game 20 times. Record on your copy of the first tally chart the number of throws you take to reach the finish. For example:

Game	Tally	Number of throws
1		4
2	I	6

- b. Summarise your results in the second tally chart. For example:

Number of throws	Tally	Number of games (total = 20)
1		0
2		3

2. What pattern can you see in your second tally chart?
3. Compare your chart with a classmate's. Discuss how they are similar and different and why.

**Finish**
