

Space Escape

Activity

Huia's aunt has given her \$5 for her birthday. Huia goes to town to spend the money playing video games.

Each video game machine can only take one type of coin.

1. How many different games would Huia be able to play if she tried to spend all her money on the video games?
2. How many different games would Huia be able to play if she spent only \$2.50?
3. How many times would Huia be able to play a 50 cent game with her \$5?
4. If Huia's favourite game were Moon Walkers, how many times could she play it?
5. If Huia's favourite game were Invaders, how many times could she play it?
6. Huia used some of her \$5 to buy a can of fizzy drink. The fizzy drink cost \$1.50. The shopkeeper gave Huia the change from her \$5 in 50 cent and 20 cent coins. What games might Huia be able to play with her change?
