

# Treasure map

Captain Blackheart **buries** his treasure but **loses** his treasure map! But all is not lost. His trusty crew remember different bits of the map.

“I remember drawing it with 5 squares each way”, says the Captain.

“There was a row of three trees running due East from the square (1,1)”, Peg Leg Pete says. “You put each one of them on a different square.”

“Weren’t there four granite boulders going due South from (5,5)?” John asks. “I think you put one of them each in a square too.”

“Ah! Now I remember!” yells the Captain. “I buried the treasure half way between the first rock and the most western tree!”

Where is the treasure?
