Tummyache

You need ☑ coloured counters

Activity

1. Kate is going to share a packet of lollies with her friends.

Greg, you can have the yellow ones.

Jan, you can have the orange ones.

Bruno, you can have the red ones.

I'll have the green ones

When they open the packet, they find:
   a. How many lollies are there altogether?

   b. What fraction of the packet do they each get?

   c. Is this a fair way to share the lollies?

2. The children decide that this isn't a fair way to share the lollies, so they share them equally without worrying about the colours.

   a. How many lollies does each person get?

   b. What fraction of the packet does each person get?

3. Which of the packets of lollies shown below could the four children share equally? Why?
