

Using Resources

Activity

1. With a classmate:
 - a. find different meanings for the word “resource”
 - b. discuss how a resource can be a person as well as a thing.
2. The students in Room 12 are discussing resources. Mr Lee turns on the data show:

Our World's Resources

Renewable

Non-renewable

A renewable resource can never be completely used up (is infinite) or can be replaced within a reasonable space of time.

A non-renewable resource can be used up (is finite) or takes a very long time to replace itself.

Our World's Resources

Renewable

Non-renewable

A renewable resource can never be completely used up (is infinite) or can be replaced within a reasonable space of time.

A non-renewable resource can be used up (is finite) or takes a very long time to replace itself.

With your classmate, discuss the information on the data show. Explore a variety of resources and decide whether they are renewable or non-renewable.
