## Show with equipment

Show with a picture

Write a word story

We had a pizza that Mum said
I could share with my two friends
but I had to leave two equal pieces
for my 2 brothers.
So we cut it into fifth parts and we
took 3 fifth parts and left 2 fifth parts
for my brothers

5 fifths – 2 fifths

$$\frac{3}{5}$$

three fifths

two fifth parts + one fifth part
